

RICHARD FELCIANO

FURIES

for 3 sopranos & 3 flutes [^I doubling piccolo
^{III} doubling alto]

Commissioned by the Noh Oratorio Society

Furies should be presented like an evil incantation, always sinister in character, with much modulation of the voice. The tempo is furioso, but not so fast that absolutely clear enunciation and crispness of consonant and vowel color is compromised.

There are two scores, one for the flutes, one for the voices. Flute I and Soprano I serve as leaders, cueing the members of their respective groups with the aid of a stopwatch.

Most of the score is not synchronized precisely. One important exception is to be found at the 3-minute cue and thereafter, where the flutes take over a soprano repeated-note cluster and continue in exactly the same coordinated rhythm and articulation. This must be perfectly coordinated, as though the flutes were activated (invoked) by the sopranos. For this reason, page 2 in both flute and voice parts is a full score. Note that, even here, there is not always a vertical coincidence of events.

The piece begins with all performers clapping their hands once, simultaneously with the first entry.

2:20
▼ = cue at 2 minutes, 20 seconds

After a cue is given, move as quickly as convenient (finish performing the fragment you are performing, but not the whole passage) to the next passage or repetition. Exception: the 3 minute climax cue on page 2, where all performers must synchronize.

 a slash = as fast as possible

headless notes following a pitch = repeat the same pitch 

headless notes not " " " = free, following the registers suggested by the notation 

 = six staccato repeated notes, as fast as possible; leave for the rest at whatever tempo is adopted

[ə] b g d k p t = the IPA symbol preceding a series of consonants indicates that the vowel sound the symbol represents should be used after each of the following consonants

Symbols used

[ə] = uh as in oven

[o] = oh as in rowing

[ʊ] = oo as in moon

[i] = ee as in meet

[ɑ] = ah as in father

[ɛ] = eh as in bed

[ɔ] = aw as in jaw

[æ] = as in cat

[ɪ] = ih as in hit

— = sustain ad libitum; duration up to performer

all staccatos very short: staccatissimo!

AFAP = as fast as possible

⚡ = breath pause, as brief as possible; move on immediately; keep sound going

accidentals apply to notes immediately repeated but not beyond

 cresc. from (dim. to) nothing

▼ = without time indication = coordination cue, not time cue

Note

These Furies manifest themselves in a babble, a demonic proto-language. They are a symbol of the undisciplined, of instinctual creative energies. They control the dark powers of the subconscious and can be dispersed only by making conscious the same force, thus absorbing it rather than imputing it to another. They are a projection of the male anima: the primitive female aspect of man's subconscious -- the incarnation of desire, fear, and other psychic tendencies incompatible with self, partly because they are too childish, or at least, child-like.

--Richard Felciano
