

RICHARD FELCIANO

ISLANDS OF SOUND

an environment for multiple carillons

commissioned by The Fort Worth Art Museum

PERFORMANCE INSTRUCTIONS

1. In performances for multiple carillons, each carillonneur must synchronize his watch with a central source (probably telephonic). In this way, tower(s) playing Module III will begin precisely at a predetermined time, tower(s) playing Module II will begin 35 seconds later, and tower(s) playing Module I will begin one minute, four seconds after the first stroke of Module III.
2. Performers of Modules II and III may need a stopwatch in order properly to space the events which begin their parts. See also 10. below.
3. Once each module has entered, exact coordination of parts is not essential, but a precise tempo of MM = 55 or 60 (as indicated) must be maintained.
4. All  are equal and all  are equal, regardless of groupings () () unless a division of the beat is specifically indicated () (). Groups, like measures, are determined by the nature of the material and may be of any length.
5.  :  = repeat  = play three times
6. An assistant may be necessary to play a few four-note chords.
7. All grace notes are fast.
8. Accidentals are good only for the note they precede.
9. Duration of the composite work is about 20 minutes.
10. As an aid to maintaining the proper tempo for long periods, bracketed numbers in the parts indicate time elapsed since the beginning of the composite work (the first note of Module III). While it is not necessary to follow them rigidly, they should be adhered to as closely as possible. To this end, a stopwatch may be useful for each player throughout.

Islands of Sound is a multi-carillon environment commissioned by the Fort Worth Art Museum. There are three basic scores or "modules" which may be performed singly (one bell-tower) or in any combination (multiple towers). Multiple towers may be within audible range of one another or in distant locations. The modules are musically constructed so as to be independent as well as interdependent; thus the listener may logically perceive them singly or in any combination; he may also move among them during performance. The work is thus rather like an enormous mobile whose elements may be perceived in whole or in part and in any combination. Since there is no limit to the number of towers which may participate or to the geographical area in which they are located, it also has a conceptual kinship with earthworks in the visual arts (attempts to work directly with the landscape -- in this case with simultaneously vibrating spots on the surface of the earth; with "islands of sound").

S 5

Handwritten musical score on ten staves. The notation includes treble clefs, key signatures of one sharp (F#), and various rhythmic values. The score is divided into measures by bar lines, with some measures containing repeat signs (double bar lines with dots) and others containing multi-measure rests (indicated by 'x' and a number). The notation is written in a fluid, handwritten style.

Measure numbers and time signatures are indicated in brackets at the beginning of some staves:

- Staff 2: [12:40]
- Staff 3: [13:04]
- Staff 4: [13:12]
- Staff 5: [13:31]
- Staff 6: [13:42]
- Staff 7: [13:51]
- Staff 8: [14:10]
- Staff 9: [14:57]
- Staff 10: [15:28]

Dynamic markings and performance instructions are present throughout the score:

- Staff 8: (f) mf f mf f mf

Handwritten musical notation on two staves. The first staff contains notes with time markers [17:52] and [18:07], and a measure marked 2x. The second staff contains notes with time markers [18:25] and [18:43], and a measure marked 3x. A bracket labeled "ossia" spans a section of the second staff. The notation includes various musical symbols such as notes, rests, and accidentals.
